

## Hongyi Chen

	<b>Homepage:</b> <a href="https://hychen-naza.github.io/">https://hychen-naza.github.io/</a>	<b>Email:</b> <a href="mailto:hchen657@gatech.edu">hchen657@gatech.edu</a>
RESEARCH INTERESTS	<p><b>High-level robot planning and reasoning:</b> Language-model based high-level task reasoning and decomposition; Neuro-symbolic planner; Planner-guided progressive skill learning.</p> <p><b>Trustworthy learning algorithms:</b> Design reliable learning and execution models using rigorous control theory to achieve safety assurances and robustness guarantees.</p> <p><b>Application:</b> Smart robotics for manufacturing applications and daily household assistants.</p>	
EDUCATION	<b>Georgia Institute of Technology</b> , Atlanta, GA M.S in Robotics; GPA: 4.0 / 4.0	May 2023
	<b>Carnegie Mellon University</b> , Pittsburgh, PA M.S in Electrical and Computer Engineering; GPA: 3.72 / 4.0	May 2021
	<b>Peking University</b> , Beijing B.A in Economics; GPA: 3.19 / 4.0	June 2019
	<b>Beijing University of Chemical Technology (BUCT)</b> , Beijing B.S in Mathematics and Applied Mathematics; GPA: 3.88 / 4.0	June 2018

RESEARCH EXPERIENCE	<b>Georgia Institute of Technology</b> , Atlanta, GA Advisor: <a href="#">Patricio A. Vela</a> , School of Electrical and Computer Engineering	Dec 2021 – present
	<ul style="list-style-type: none"><li>• Designed a hierarchical solution consisting of a multi-phase planner and a low-level safe controller to jointly solve the safe navigation problem in crowded, dynamic, and uncertain environments.</li><li>• Developed a hybrid planner combining symbolic and neural-based approaches for human instruction parsing and task planning, and further designed a semantic graph neural network guided object searching for home-assistant robots.</li></ul>	
	Advisor: <a href="#">Danfei Xu</a> , School of Interactive Computing	
	<ul style="list-style-type: none"><li>• Decompose high-level tasks into mid-level plans with language models and train the task skills in self-supervised way through language guidance.</li></ul>	
	<b>Massachusetts Institute of Technology</b> , Cambridge, MA Advisor: <a href="#">Joshua B. Tenenbaum</a> , Department of Brain and Cognitive Sciences	Jun 2022 – present

	<ul style="list-style-type: none"> <li>Proposed an iterative planning approach with language models through energy minimization, and further demonstrate its unique benefits, including new task generalization, test-time constraints adaptation, and the ability to compose plans together.</li> </ul>	
	<b>Carnegie Mellon University</b> , Pittsburgh, PA	Jan 2021 – Sep 2021
	Advisor: <a href="#">Changliu Liu</a> , Robotics Institute	
	<ul style="list-style-type: none"> <li>Exploited safe control theory to address two major challenges in reinforcement learning (RL): satisfying safety constraints and efficiently learning with limited samples.</li> </ul>	
	<b>Tsinghua University</b> , Beijing	Jun 2018 – Sep 2018
	Advisor: <a href="#">Zhihui Du</a> , Department of Computer Science and Technology	
	<ul style="list-style-type: none"> <li>Accelerated online-searching for gravitational waves by parallelizing the linear recurrence and optimizing the inefficient memory access in GPU.</li> </ul>	
	<b>Beijing University of Chemical Technology</b> , Beijing	Feb 2018 – May 2018
	Advisor: <a href="#">Fan Zhang</a> , College of Information Science and Technology	
	<ul style="list-style-type: none"> <li>Designed slimmed CNN in resource-constrained platforms, achieving 40x model compression while maintaining its accuracy for synthetic aperture radar target recognition.</li> </ul>	
PROFESSIONAL EXPERIENCE	<b>Carnegie Mellon University</b> , Pittsburgh, PA Autonomous Driving Software Engineer	May 2020 – Aug 2020
	<ul style="list-style-type: none"> <li>Implemented path planning algorithms, from high level behavior planning to low level RRT path generation; Improved localization accuracy by fusing the IMU and GPS sensor.</li> </ul>	
	<b>Interdisciplinary-Technology Company</b> , Beijing	Feb 2020 – May 2020
	Quantitative Trading Researcher	
	<ul style="list-style-type: none"> <li>Constructed and optimized effective stock factors using genetic algorithms and further developed the dynamic contextual multi-factor model to build stock portfolio.</li> </ul>	
COURSE PROJECTS	<b>Carnegie Mellon University</b> , Pittsburgh, PA 18-349 Introduction to Real-Time Embedded Systems (A)	
	<ul style="list-style-type: none"> <li>Developed a real-time kernel capable of admission control, task scheduling, isolation, and synchronization.</li> </ul>	
	<b>Georgia Institute of Technology</b> , Pittsburgh, PA CS8803 Special Topics in Compiler (A)	
	<ul style="list-style-type: none"> <li>Built a TigerCompiler that includes scanner, parser and syntax error detector in front-end, and is capable of semantics analysis and IR code generation in back-end.</li> </ul>	
AWARDS AND HONORS	Outstanding Undergraduate Thesis (Top 1%) of BUCT, 2018	
	Outstanding Student Scholarship (Top 5%) of BUCT, 2014, 2015	
TECHNICAL SKILLS	<b>Programming:</b> C/C++, Python, Java, CUDA <b>Tools:</b> Tensorflow, Pytorch, ROS <b>Languages:</b> Proficient in English and Chinese
